

Hey Neighbor!

I have an important message for you regarding New York's Fastest Fiber-Optic Internet Provider, Greenlight Networks!

Greenlight Networks is building a fiber-optic network right to the home which involves significant design, planning, and construction work to lay hundreds of miles of new fiber-optic cable. This new network supports much faster and more reliable Internet speeds than traditional networks. Where and when they build is based on several factors including customer demand, cost, and complexity of building the district, number of easements and permits required, among other factors. If you're interested in learning more about the construction of a fiber-optic network, read their "5 Steps to Fiber" blog.

Not only is fiber-optic internet faster but it's more affordable. Greenlight offers GIG speeds for as low as \$75 per month. No contracts, hidden fees, and taxes!

The best way to stay in the loop with the status of your home is by clicking the "check availability" button on [greenlightnetworks.com](http://greenlightnetworks.com)! There you can sign up for updates in your neighborhood or place an order if service is available. Plus, it shows that there is interest in our area! So, sign up today and help us get connected to reliable and affordable Internet!
